Re: Project 2009-93, Proposed drawdown of Chazy Lake for the control of aquatic invasive vegetation

Dear Mr. Pivetta:

We are contacting you with regard to conducting a modest drawdown of Chazy Lake of one to two and half feet.

As stated in our letter to you dated August 26<sup>th</sup>, 2011, in recent dialogue we have been told that in the past, the Town regularly drew the lake down a modest one to two feet prior to winter. To re-emphasize, if this is true, such a recurring drawdown does not require a permit. We would recommend that such a drawdown occur beginning about September 15 and also maintain run-of-river through the winter.

Ed Snizek and Holly Kneeshaw are looking forward to the meeting scheduled for 10 am on Wednesday September 14<sup>th</sup> with you at the Town Hall to discuss a four foot drawdown of the lake for next year to address the milfoil problem.

Sincerely,

Richard E. Weber, III  
Deputy Director, Regulatory Programs

Cc: Gary Germain, Chazy Lake Environmental Committee
